INTRODUCTION

The 1800 Federal population census schedules give, for each family, the name of its head plus the number of family members (including the family head) in each of the following 12 categories:

A. Free white males under 10 years of age.

B. Free white males of 10 years and under 16 years of age.

C. Free white males of 16 years and under 26 years of age.

D. Free white males of 26 years and under 45 years of age.

E. Free white males of 45 years and older.

F. Free white females under 10 years of age.

G. Free white females of 10 years and under 16 years of age.

H. Free white females of 16 years and under 26 years of age.

J. Free white females of 26 years and under 45 years of age.

K. Free white females of 45 years and older.

L. All other free persons except Indians not taxed.

N. Slaves.

In the census transcript following, the capital letters across the top of each page correspond to the categories described above. Thus, each line in the transcript contains all available data on one family. Take the following example for illustration:

Smith, William	1	0	0	1	0	0	1	0	1	0

From this, we see that the family head is named William Smith. The family contains one free white male under 10 years of age, one free white male between 26 and 45 years, one free white female between 10 and 16 years and one free white female between 26 and 45 years. It is well to keep in mind, when using this material, that there is no assurance of relationship among the people of a given "family", as the word was then used for census purposes. Servants, employees - in fact, anyone living in the household at the time the enumerator passed by - were included as part of the family.

Data for this transcript were taken from a positive microfilm copy of the original census schedule, obtained from the National Archives in Washington, D. C. As census schedules of this period go, this one appears to have been carefully written and is generally quite readable. The microfilm copy is of good quality. Inevitably there are a few names and numbers that cannot be unambiguously interpreted. In each such instance the most probable interpretation has been given, followed by a question mark in parenthesis.

With few exceptions, spellings of names and places as used by the census enumerators have been adhered to. "Ch." and "St." have been used consistently as abbreviations for "Chester" and "Lancaster", although several variations were used by the enumerators.

Families within each town appear in the same order in this transcript as they do in the original census schedules. The 1850 Lancaster County towns have been arranged alphabetically for this transcription, although they were not so arranged in the original schedules.

In the index, names of family heads are arranged alphabetically by surname. The number following each name gives the page in the transcript on which complete data on that family will be found.

In 1850, Lancaster County consisted of considerably larger area than does the present Lancaster County. One can get a better idea of the extent to consideration, larger than the following 11 present-day New York State counties were contained, over a period of time, in the 1850 Lancaster County.
